ADDENDUM NO. ONE.

The County of Mercer received the following inquiry with regard to the project located at the Ewing Branch Library:

Secondary communications room:

Q1. Where is the "book drop" room located?

A1. Refer to the Ewing Library schematic. It is the room to the left of the jacks marked 10 V.

Q2. Will the connecting cable for Data be a fiber or copper cable run?

A2. The data connector is copper.

Q3. If fiber, could you specify type and how many strands (ie. OM1,OM2,OM3,OM4, 6 STRAND,12 STRAND,ETC.)?

A3. See response to Q2.

Q4. Will a connecting backbone cable be needed between communications rooms for voice drops (ie.25PR CAT3 )?

A4. For the phone, we require a connector since we have an old-style phone system. The connector should be 25PR cat3 Plenum.

Q5. Is plenum cable required?

A5. Refer to the specifications as plenum cable is defined and noted as required per building codes.

Q6. Can you specify required lengths for patch cables and station cables?

A6. No, this is more dependent on the final work. The length depends on where the awarded contractor mounts the patch panels and places the jacks.

Q7. Swing gate racks are specified along with 2 post attachment shelves in two separate rooms (4 altogether), however with 2 post attached shelves in two separate rooms you will not be able to swing rack open. Please clarify.

A7. This is the set-up at the Library locations and has worked well.
